César Maldonado

Web Developer

Medellín, Colombia | +57 301 7705464 | cesaramg.14@gmail.com | Portfolio | LinkedIn

Electronic Engineer passionate about technology and front-end development. Throughout my career, I have successfully developed and implemented full-stack web applications using technologies such as JavaScript, React, PHP, Python, MySQL, and WordPress. I have also worked on numerous freelance projects, ranging from creating websites from scratch to modifying and optimizing existing sites.

PROFESSIONAL EXPERIENCE

Freelancer – Full Stack Web Developer

January 2021 - Now

- Website development from scratch using WordPress and Elementor. Theme and plugin customization, creating maintainable and scalable PHP, CSS, and JavaScript code. Online store development using WooCommerce, including payment system configuration and product creation.
- Developed static pages designed in Figma using HTML, JavaScript, Bootstrap, Tailwind, and React for multiple clients and companies. Utilized best practices for each website to ensure accurate display across multiple devices and screens, with search engine-optimized content and high performance.
- Development of complex web applications such as: a login page for a Mikrotik Hotspot using Python Flask, which manages Wi-Fi access for thousands of customers who visits the shopping center. Adjustment and creation of new features for a WhatsApp chatbot using PHP, which serves a database of more than 2,000 customers. Development of new features for a pet service reservation system located in Spain, including: notification and service management functions via email, pet data modification, and a return system, among others.

No country – Frontend Developer

November 2024 - February 2025

- Participated in two job simulations alongside a team of backend developers, UX/UI designers, and QA analysts, where I was in charge of frontend development. Two web applications were created: one consisting of a system focused on digital solutions for the banking sector, and the other consisting of an administrative system for restaurants to manage their sales and services. Agile Scrum methodologies were used during the development of these applications.

Agencia Marítima de Servicios – Wordpress Web Developer

September 2018 - December 2020

- Creation, design and management of Company's website.
- Hosting and domain management.
- Wordpress installation, plugin management and server configuration.
- Responsive Web Design.

Additional Experience.

August 2012 – August 2024

- Previous roles at Servicios Telefónicos Marcos, Hiper Bodegón Vessada y Centro Sambil Paraguaná allowed me to strengthen my knowledge in telecommunications and IT, working as a WAN/LAN Network Administrator and Level 2 and Level 3 technical support.

EDUCATION
